Profile

Master's graduate in **Artificial Intelligence** with a strong passion for data analysis and technological innovation. I bring a wealth of experience in the finance sector, where I contributed to the development of **business intelligence** solutions. Proficient in managing complex projects and leading teams, I successfully coordinated the evolution of various projects for diverse clientele.

Previously, I worked as a **full stack developer**, gaining a comprehensive perspective on web application development. My enthusiasm for Artificial Intelligence seamlessly merged with my ability to interpret data, enabling me to craft tailored solutions.

Work Experience

2021 - Present
Reply SPA

IT Consultant

Building business intelligence solutions for financial clients. Leveraging Microsoft and OpenAI technologies such as Power BI, Azure, and GPT-4. Directing and managing teams across diverse projects.

2020 - 2021
CO D.E. Solutions SRL

Full stack developer

Developed healthcare-focused web applications using C#, Angular, and Oracle database, employing MVC patterns. Managed the codebase with DevOps and collaborated within a team on this project.

Education

2021 - 2023
Univerisità degli studi di Torino

Artificial intelligence - 110L

Academic exploration across various realms of artificial intelligence, involving project development using specific technologies. In-depth study of leading models and approaches to solving specific tasks.

2018 - 2021
Univerisità degli studi di Torino

Computer science - 109

Training in fundamental computer science constructs through theoretical discussions and the development of academic projects. In-depth exploration of object-oriented languages and key architectural patterns.
